Vitamin D, Min.....	37,500 iu/kg
Vitamin E, Min.....	2,320 iu/kg
Fluorine, Max	100 mg/kg

*Equivalent Crude Protein from Non-Protein Sources.

FEEDING RECOMMENDATIONS:

Feed this Cana-Lix Beef Pasture Plus 32% Lick Tub free choice to beef cattle in conjunction with adequate amount of good quality forage, good quality water and free-choice salt. The consumption of this lick tub supplement should be managed to 100-150 grams per head per day. Ensure cattle have consumed roughage before introducing this feed for the first time. If cattle run out of protein tubs, observe intake closely for the days after replacing the tubs to prevent over consumption. If consumption is too low, bring tubs closer to the watering and resting areas. In large pastures, tubs should be available in more than one location. If consumption is higher than desired, move tubs further away from the watering and resting areas, and/or reduce the number of tubs available to cattle. It is recommended to provide one tub for every 20-30 mature animals. Do not feed to young calves under 400lbs. Contact a New Rosedale Feedmill representative for more information.

CAUTION:

1. Directions for use must be carefully followed.
2. Do not use in association with another feed containing supplemental selenium.
3. Do not feed to sheep, due to possible copper toxicity.
4. Store in a dry area away from rodents and insects.
5. Do not feed moldy or insect-infested feed to animals as it may cause illness, abortion or death.

Individual results from the use of this product may vary due to management, environmental, genetic, health and sanitation differences; therefore, New Rosedale Feed Mill does not guarantee individual results.
